

THE LIUNA ADVANTAGE

FOR CONSTRUCTION USERS AND CONTRACTORS

Market Research and Analysis

Think union officials sit by their phones waiting for the next job to come in? Think again. The Laborers' International Union of North America (LIUNA) operates like a business. We seek out market opportunities for our members and their employers. And we work with employers, owners, and construction users to identify and meet their training, workforce, and safety needs.

LIUNA and its various affiliates conduct a wide range of sophisticated market research that responds to owners' needs while preparing Laborers and contractors for the opportunities that lie ahead. Among the markets Laborers have researched are:

- Liquefied Natural Gas (LNG)
- Microbial Remediation (Mold and Mildew)
- Ship Recycling (Scrapping)
- Underground Construction and Trenchless Technology
- Nuclear Reactor Decommissioning
- Disposal of Offshore Oil and Gas Platforms.

LIUNA also leads the industry in tracking its own share of key construction markets. Laborers and their contractors seek to be market leaders because we strive to set industry standards in wages, benefits, performance, value, and safety.
