

THE LIUNA ADVANTAGE

FOR CONSTRUCTION USERS & CONTRACTORS

Project Tracking and Project Alerts

Want timely information about upcoming bid opportunities?

Want to increase the number of qualified contractors bidding on your project?

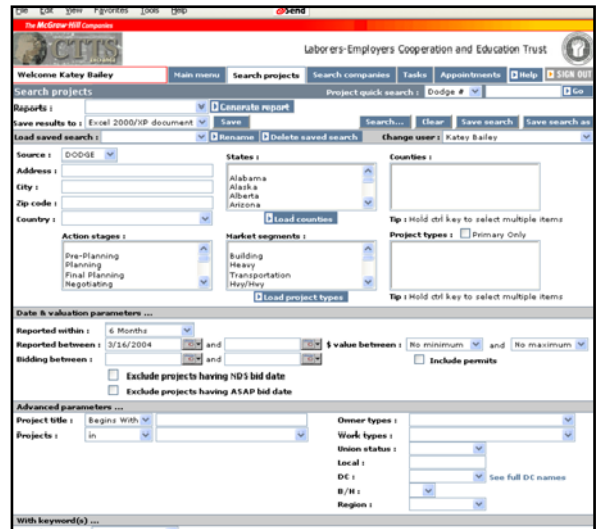

Work with the Laborers' International Union of North America (LIUNA). Our Cooperation Trust Tracking System (CTTS) connects owners and users with contractors.

- CTTS provides real-time access to the latest project information from McGraw-Hill Construction Dodge.
- We follow approximately one million construction projects, at all funding levels, and at all stages of construction, from permitting through ribbon-cutting.
- Our project alerts provide contractors time to prepare bids, and owners a large pool of high-quality bidders. These alerts covered more than \$700 million worth of work in 2004 alone.
- Our research helps contractors and Laborers meet specific project requirements.
- Local and regional affiliates make these services available to contractors and owners across North America.

Contractors who sign agreements with Laborers' local unions get a partner committed to finding them future work, even as they complete current projects.

Owners and construction users who contact the Laborers get a partner who will help them find the right contractor at the right price.

LIUNA delivers more than just well-trained, skilled construction craft laborers. LIUNA delivers business development services that generate project and job opportunities while keeping project costs competitive. That's the LIUNA Advantage.

CTTS Project Alert
